

#### **Most Effective Bird Repellent Products**

#### **ABOUT US**

It is a company that set out to produce effective bird repellent products and targeted It is a company that aims to "produce products where people will feel healthy, peaceful and safe". Birdspikes Product To finish their projects quickly and on time in order to ensure that their customers have healthy living spaces as soon as possible; it is again among our indispensable principles not to lose confidence in us in this regard. A value as important as quality and service is to offer it at an affordable cost and price.

# **OUR MISION**

To strengthen the relations with society and sector by providing lifelong healthy living space opportunities in the social dimension, to convey current knowledge and technology to social life and professional sector and to provide sensitivity to natural and cultural living life.

# **OUR VISION**

To be a pioneer in Plastic Bird thorns and Bird Repellent Methods, to produce products that run to national and universal developments, to establish stronger healthy living spaces with society and sector

#### WHY US?

Since 2012, electricity poles, factory waste in our country, due to the damage caused by unconscious persons. We try to prevent the destruction of many of the 5 billion bird species that migrate from our country every year.

As a result of our R&D studies, our bird control products that we develop every year have a great impact on the bird population.

We have reduced the risks of multiplication, poisoning and hunting that result in death of the bird species that we come to our country and host during migration by 70%.

We have achieved this success with our valuable references and users. Thus, the bird species we host in our country can continue their migration routes in a healthy way without harming them. □

## **Services**

- 1. Bird Control Systems in Residences
- 2. Energy Transmission Lines Bird Control Systems
- 3. Marina and Port Bird Control Systems
- 4. Airport Bird Control Systems
- 5. Industrial Bird Control Systems
- 6. Factory and Production Facilities Bird Control Systems
- 7. Hospital and Health Institutions Bird Control Systems
- 8. Bird Control in Agricultural Areas

## **Model: 1D Bird Barrier**

Thus, the bird species we host in our country can continue their migration routes in a healthy way without harming them.

It won't do any harm to the living. Where they can be damaged (Power Lines, Factories, Chimneys, Energy Sources, Building Roofs, etc) they will live and breed happier than those who take it plays a major role in returning them to their natural habitats.

#### **Model Features**

Prevent the birds to settle to the applied surface.

Produced from transparent polycarbon materials.

Uv protected; is not affected by solar radiation.

this is a special material that used in production of automotive,

household appliances and medical devices.

Stainless, will not rot and resistant to deformation.

Resistant to high winds and snow loads. it will be exposed to the most

defficult natural.conditions; storms, hailstones, snow and freeze.

under thees conditions the barrier will not broken and allows easy adaptation to high temperature changes.

Leightweight and Economical.

- 1. Width: 15 cm. (Standard model for small and medium-sized birds)
- 2. Length: 50 cm
- 3. Height: 11.5 cm including base height
- 4. Made of Transparent Polycarbone.
- 5. UV Protection is available.
- 6. The bottom table ends have a special puzzle lock system to prevent incorrect mounting.
- 7. 14 blocks of thorns at 50 CM, 2 bars in a single block of thorns; there are a total of 28 bars.
- 8. ESCR
- (Environmentally effective crack-resistant humidity, pressure, etc.)
- 9. Durable, resistant to breakage
- 10. Metal-free, metal coating or paint-free, stainless, it does not rot, does not corrode.
- 11. HB in the fireproof class.
- 12. Chemically resistant.
- 13. No electrical conductivity.
- 14. It is lightweight, does not place a load on the surface to which it is applied.
- 15. Parcel contents 50 m / 100 pcs

### **Model: 2D Bird Barrier**

Thus, the bird species we host in our country can continue their migration routes in a healthy way without harming them.

It won't do any harm to the living. Where they can be damaged (Power Lines, Factories, Chimneys, Energy Sources, Building Roofs, etc) they will live and breed happier than those who take it plays a major role in returning them to their natural habitats.

Our ECO 3D Transparent Model product,

which is an effective bird deterrent,

is generally it is preferred in problems with medium and small birds.

It's environmentally friendly. It won't do any harm to the living.

Where they can be damaged

(Power Lines, Factories, Chimneys, Energy Sources, Building Roofs, etc) they will live and breed happier than those who take it plays a major role in returning them to their natural habitats.

Note: Product ENH (Power Transmission Lines) originating from birds suitable for use to prevent interruptions.

TS - EN Documents are available in the products used in Overhead Lines You can order any quantity you want.

It is the most effective bird repellent product, developed as a result of long R&D studies. It is the only one in Turkey.

WIDTH: 15 CM LENGTH: 50 CM

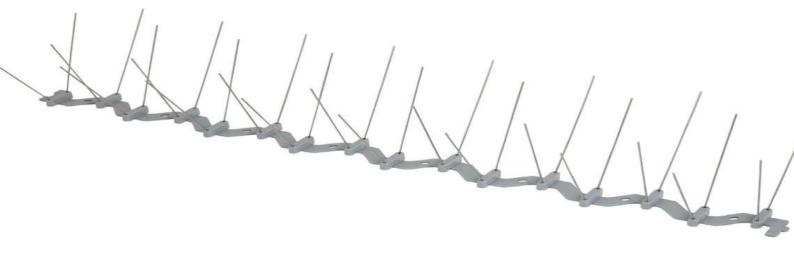

COLLAGE CONTENT: 100 Pieces (50 Meters) ECO 3D Transparent

#### DOCUMENTS OWNED BY THE PRODUCT

TS EN 60068-2-75:2000, TS EN 60112:2006 +A1:2010,

TS EN 60695-2-10:2003, TS EN 60068-2-1:2009, TS EN 60068 2-2:2012

- 1. Height: 11.5 cm including base height
- 2. Polycarbon Is Manufactured from Material. It's not recycling.
- 3. UV Protection Is Available.
- 4. The bottom table ends have a puzzle lock system to prevent incorrect mounting.
- 5. 14 blocks of thorns at 50 CM, 3 bars in a single block of thorns; there are a total of 42 bars.
- 6. ESCR (Desipressure, pressure, etc.)
- 7. Durable, resistant to breakage
- 8. Metal-free, metal coating or paint-free, stainless, it does not rot, does not corrode.
- 9. HB was in the fireproof class
- 10. Chemically resistant.
- 11. No electrical conductivity.
- 12. It is lightweight, does not place a load on the surface to which it is applied.
- 13. Minimum order is 1000 pcs
- 14. Parcel contents 50 m / 100 pcs
- 15. Turkish Property

#### **Model: Stainless Steel Bird Barrier**

It prevents birds from being placed on the surface on which it is applied. Base polycarbonate barbs are made of stainless steel material.

UV-contributed; it is not affected by the sun's rays.

Stainless, it does not rot and is resistant to deformations.

It is resistant to high wind and snow loads.

To the most difficult natural conditions:

they are subjected to storms, hail, snow and icing.

Under these conditions, the barrier does not break,

and from the cold of winter to the heat of summer,

they easily adapt to high temperature changes.

It's light.

It's economical.

It is a specially designed product

- 1. Width: 15 cm. (Standard model for small and medium-sized birds)
- 2. Length: 50 cm
- 3. Height: 11.5 cm including base height
- 4. Made of stainless steel.
- 6. The bottom table ends have a special puzzle lock system to prevent incorrect mounting.
- 7. 14 blocks of thorns at 50 CM, 2 bars in a single block of thorns; there are a total of 28 bars.
- 8. ESCR

(Environmentally effective crack-resistant humidity, pressure, etc.)

- 9. Durable, resistant to breakage
- 10. Metal coating or paint-free, stainless, it does not rot, does not corrode
- 11. HB in the fireproof class.
- 12. Chemically resistant.
- 13. No electrical conductivity.
- 14. It is lightweight, does not place a load on the surface to
